Handy Calibrator

CA150

Multi-functional Hand-held Calibrator

- ● Highly accurate within 0.02% of the DC voltage range for source and measure
- ● Source and measurement can be performed simultaneously.
- ● Vertical body with large-screen display
- ● Loop power supply function (24 VDC at a load of max 22 mA)
  It is possible to measure current in the mA range while supplying power.
- ● Sink function
- ● Sweep functions that allow 3 types of continuous outputs:
  Step sweep function
  Linear sweep function
  Program sweep function

CA150

Multi-functional and high-precision calibrator that can be used to calibrate and test industrial process devices and various electronics equipment

Functions/Features

■ Vertical hand-held calibrator

Easy-to-hold vertical body is designed to make it intuitively easy to operate, as individual functions are accessed directly by pressing assigned keys.

Using the main body case (model No. 93027) (sold separately), you can hang CA150 to your body or a handrail to keep it handy.

■ Simultaneous source and measurement for process devices

In conventional calibration applications, multiple devices such as a standard generator, dial resistor and multi-meter were required. Now with a single CA150 unit, it is possible to perform operation check at regular inspection and maintenance of thermocouples, RTDs and instruments, as well as maintenance and equipment diagnosis of process devices such as transmitters, thermostats and signal converters.

■ Loop power supply function

It is possible to measure generated current signals while supplying loop power 24 VDC from a two-wire type transmitter (up to 22 mADC).

■ Highly accurate and multi-functional source and measurement

High accuracy: 0.02% for the source unit and 0.02% for the measurement unit
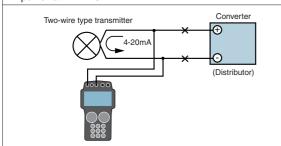

Source and Measurement functions: DCV voltage, DC mA, ohm, frequency and temperature (thermocouple, RTD) and 24 VDC power supply function for transmitters

Two-wire Type Transmitter Applications

■ Two-wire type transmitter (measurement function) application
#### ○ Loop check function

Measures mADC signals output while supplying transmitter power at 24 VDC.

Two-wire type transmitter — 4-20mA — Converter ⊕ ⊖ (Distributor)

■ Two-wire type transmitter (source function) application
○ Sink function

Receives current (Sink) from the power supply at voltages of up to 28 VDC and transmits mADC signals to the loop.

Two-wire type transmitter — 4-20mA — Converter ⊕ ⊖ (Distributor)

Memory Functions

○ Setting memory

This function saves/loads setting conditions.
Up to 21 data items can be stored.
Settings for (source/measurement) functions, ranges, generated values/measured values as well as setting mode conditions can be stored.

○ Data memory

This function saves source and measure values displayed.
Up to 100 data items can be stored.
Storage date/time, (source/measurement) functions, ranges and generated values/measured values can be stored.
Stored data can be checked on the display of the main unit as well as via communication.

Convenient Functions Useful in Field Tests
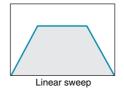

Sweep Functions (Automatic Output Functions)

■ Step sweep function

This function changes the output in a staircase (step) pattern at fixed intervals.

Step sweep

■ Linear sweep function

This function increases (or decreases) the output linearly with respect to the generated value.

Linear sweep

■ Program sweep function

This function outputs source setting values stored by the data memory function sequentially in the order they are stored in the memory.

Program sweep

General Specifications

○**Specifica tions common to source and measurement**
- Communication functions
  Serial interface
  RS232 D-Sub 9-pin connector
- Memory functions
  Data can be stored and loaded in setting memory (setting data) and data memory (source/measurement).

	Items stored/loaded	Number of data items that can be stored
Setting memory	(source/measurement) functions, ranges, generated values/measured values and setting mode conditions	21set
Data memory	Storage date/time, (source/measurement) functions, ranges and generated values/measured values	100set

○**Common source specifications**
- Power supply: 6 AA size alkaline batteries AC adapter (sold separately) or dedicated NiMH battery (sold separately) AC adapter specification: 100 to 240 VAC, 50/60 Hz, 1.4 A OUTPUT: 12 VDC, 3 A
- Battery life Conditions: Simultaneous Source/measurement Output of 5 V DC/10 kΩ or more Size AA alkaline batteries When 6 batteries are used: Approx. 8 hours When NiMH battery is used: Approx. 10 hours
- Auto power-off: Approx. 10 minutes; it can be canceled by setting.
- Insulation resistance: Between input terminal and output terminal: 500 VDC, 50 MΩ or more
- Withstand voltage: Between measurement terminal and generation terminal: 350 VAC, 1 minute

- Operating temperature/humidity range: 0 to 40°C, 20 to 80%RH (no condensation)
- Storage temperature range: -20 to 60°C 90%RH or less (no condensation)
- External dimensions: Approx. 251 x 124 x 70 mm
- Weight: Approx. 1000 g (with Batteries)
